

Nam-Trung Nguyen

With his pioneering work in the field of micro/nanofluidics, Nam-Trung Nguyen's research bridges the gap between engineering and chemistry. He has contributed to the development of polymeric microtechnologies, fundamentals of micro/nanofluidic transport phenomena, and micro optofluidics and their applications for analytical chemistry as well as life sciences. Nguyen is an Associate Professor in the School of Mechanical and Aerospace Engineering at Nanyang Technological University in Singapore. Ph.D. (2004), Chemnitz University of Technology.
